

Varshini Chintha

Junior AI Engineer | Python | LLMs & RAG Systems

chinthavarshini4@gmail.com | +91 7207893848 | [LinkedIn](#) | [GitHub](#) | Andhra Pradesh, India

PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence & Machine Learning with hands-on experience building Python-based AI applications, training deep learning models, and deploying cloud-based systems. Completed an industry internship at Infosys Springboard developing multimodal AI pipelines. Currently building expertise in LLMs, LangChain, RAG pipelines, and AI agents — the core technologies of this role. Highly motivated, fast learner, and passionate about building real-world AI products.

TECHNICAL SKILLS

AI / LLMs	LLM APIs (OpenAI / Claude), RAG pipeline concepts, LangChain (learning), Prompt Engineering, AI Agents
ML & DL	CNN, NLP, OCR, Model fine-tuning, Multimodal AI, Supervised learning, Scikit-learn, TensorFlow
Python	Python (OOP, data structures), Flask, FastAPI (learning), Pandas, NumPy, OpenCV
Vector DBs	ChromaDB, Pinecone (learning), Embeddings, Semantic search basics
Dev & Cloud	Git & GitHub, Azure (AI-900), Render, MongoDB, VS Code, GitHub Copilot
Web	HTML, CSS, JavaScript — REST API design and integration

PROFESSIONAL EXPERIENCE

AI / ML Engineer Intern | Infosys Springboard

Nov 2025 – Jan 2026

- Fine-tuned CNN and OCR models for ingredient recognition, improving accuracy by ~15% over baseline through targeted dataset curation and augmentation.
- Built end-to-end AI pipeline in Python: data ingestion → preprocessing → model training → evaluation → cloud deployment.
- Preprocessed large multimodal datasets (image + text) ensuring quality and consistency for model reliability.
- Collaborated with cross-functional team to deliver a production-ready AI application within deadline.

PROJECTS

Intelligent Recipe Generator

Python · CNN · OCR · NLP · Multimodal AI

- Built a multimodal AI pipeline that extracts structured data from unstructured image and text inputs — architecture directly analogous to RAG and LLM-based document processing systems.
- Achieved ~85% accuracy in ingredient recognition using CNN + OCR on noisy real-world images; reduced manual search time by ~60%.
- Processed multi-format inputs to generate structured, personalized outputs automatically — mimicking LLM response pipelines.

GitHub: github.com/ChinthaVarshini

Women Safety & Empowerment App

Python · Flask · REST API · Cloud Deployment

- Designed and deployed a Python Flask REST API backend — foundational skills directly applicable to building AI agent APIs with FastAPI.
- Implemented real-time GPS data streaming and instant alert delivery, demonstrating event-driven system design.
- Deployed end-to-end on Render cloud — demonstrating full deployment pipeline from development to production.

Live: women-safety-and-empowerment-1.onrender.com | GitHub: github.com/ChinthaVarshini/women-safety-and-empowerment

Library Management System

Python · OOP · Data Structures

- Built Python OOP application managing 500+ records with efficient search and CRUD — demonstrating clean code and strong programming fundamentals.
- Reduced manual record management time by ~70% through optimized data pipelines.

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning | Sri Vasavi Engineering College, AP *2023 – 2027*

CGPA: 8.59 / 10.0 | Coursework: ML, Deep Learning, Computer Vision, NLP, Data Structures & Algorithms

CERTIFICATIONS

Microsoft Azure AI Fundamentals (AI-900)

Salesforce Certified Agentforce Specialist (AI-201)

MongoDB Certified Associate Atlas Administrator

CURRENTLY UPSKILLING

LangChain & LangGraph · RAG pipeline architecture · Vector databases (ChromaDB, Pinecone) · PyTorch · FastAPI · AI Agents & tool-use patterns

COMPETITIVE PROGRAMMING

Actively practising DSA (Arrays, Linked Lists, Recursion, Dynamic Programming) on [LeetCode](#), [GeeksforGeeks](#), and [HackerRank](#).
