

VARSHINI CHINTHA

ML Engineer | AI/ML Researcher | Document Intelligence

chinthavarshini4@gmail.com • +91 7207893848 • [LinkedIn](#) • [GitHub](#) • Andhra Pradesh, India

PROFESSIONAL SUMMARY

Final-year B.Tech student in AI & ML with hands-on experience building multimodal AI systems, training deep learning models, and deploying real-world AI applications. Proven track record at Infosys Springboard in end-to-end ML development including dataset curation, model fine-tuning (CNN, OCR, NLP), and improving recognition accuracy by ~15%. Passionate about document intelligence, vision-language models, and LLM-ready data pipelines — directly aligned with Unsiloed AI's mission.

TECHNICAL SKILLS

ML & Deep Learning	CNN, Transformer architectures, Model fine-tuning, Multimodal models, Supervised learning, NLP, OCR
Frameworks & Tools	Python, PyTorch (learning), TensorFlow, Scikit-learn, OpenCV, Pandas, NumPy
Document AI	OCR, Multimodal data extraction, Structured/unstructured data parsing, Ingredient recognition via vision
Cloud & MLOps	Microsoft Azure (AI-900 certified), Salesforce Agentforce (AI-201), MongoDB Atlas (certified), Render (deployment)
Programming	Python, Java, HTML, CSS, JavaScript
Research Skills	Paper reading & implementation, benchmarking, dataset curation, model evaluation

PROFESSIONAL EXPERIENCE

AI/ML Engineer Intern | Infosys Springboard

Nov 2025 – Jan 2026

- Fine-tuned CNN and OCR models for ingredient recognition, improving accuracy by ~15% over baseline.
- Curated and preprocessed large-scale multimodal datasets (image + text) to enhance model reliability.
- Built end-to-end AI pipeline: data ingestion → model training → evaluation → deployment on cloud.
- Collaborated cross-functionally to ship a real-world AI application on schedule.

PROJECTS

Intelligent Recipe Generator

Multimodal AI | CNN | OCR | NLP

- Built multimodal AI system combining Computer Vision, OCR, and NLP to extract and interpret unstructured data from images and text — directly analogous to Unsiloed AI's document parsing pipeline.
- Achieved ~85% accuracy in ingredient recognition using CNN + OCR on complex visual inputs.
- Reduced manual recipe lookup time by ~60% via automated structured output generation from unstructured inputs.
- Processed multi-format user inputs to generate structured, personalized outputs in seconds.

Women Safety & Empowerment App

Full-Stack | Cloud Deployment | Real-time

- Designed and deployed a real-time web app with live GPS-based data streaming and instant alert delivery.
- Deployed on cloud (Render) with public access — demonstrating end-to-end deployment skills.
- Built for a hackathon addressing real-world challenges; focused on responsive, accessible UI.

Live Demo: women-safety-and-empowerment-1.onrender.com

Library Management System

Python | Data Structures | Optimization

- Handled 500+ structured records with fast search and update — demonstrating data management and structured storage skills.
- Reduced manual record management time by ~70% via optimized Python data pipelines.

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning |

2023 – 2027

Sri Vasavi Engineering College, Tadepalligudem, AP

CGPA: 8.59 / 10.0 | Relevant coursework: ML, Deep Learning, Computer Vision, NLP, Data Structures & Algorithms

CERTIFICATIONS

🏆 Microsoft Azure AI Fundamentals (AI-900)

🏆 Salesforce Certified Agentforce Specialist (AI-201)

🏆 MongoDB Certified Associate Atlas Administrator

COMPETITIVE PROGRAMMING & DSA

Actively solving DSA problems (Arrays, Linked Lists, Recursion, Dynamic Programming) on [LeetCode](#), [GeeksforGeeks](#), and [HackerRank](#).
