## SUMMARY

Final-year engineering student specializing in Artificial Intelligence and Machine Learning. Experienced in Python, data preprocessing, and building ML-based mini projects. Focused on building practical AI/ML solutions using Python and modern machine learning techniques.

## EDUCATION

**B.Tech in Artificial Intelligence and Machine Learning** --- 8.59 cgpa 2023 – 2027  
Sri Vasavi Engineering College, Tadepalligudem, Andhra Pradesh

**Intermediate** ---98.1% 2021 – 2023  
aditya junior college,palakol,andhra pradesh

## CERTIFICATES

**Azure AI Fundamentals (AI-900)**  
– Microsoft 🔗

**MongoDB Certified Associate**  
Atlas Administrator 🔗

**Salesforce Certified Agentforce**  
Specialist (AI-201) 🔗

## SKILLS

### Programming

Python  
Java

### Machine Learning

Data preprocessing  
Model training and evaluation  
Basic supervised learning algorithms

### Cloud & Platforms

Microsoft Azure, Salesforce

### web technologies

HTML  
CSS  
JavaScript

## CODING PROFILES

**LeetCode:** <https://leetcode.com/u/Umt3qDubj2/> 🔗

**GeeksforGeeks:** <https://www.geeksforgeeks.org/profile/chinhavajpbt> 🔗

**HackerRank:** <https://www.hackerrank.com/profile/chinthavarshini4> 🔗

Actively practicing Data Structures & Algorithms including Arrays, Linked Lists, Recursion, and Basic Dynamic Programming.

## PROJECTS

### Women Safety & Empowerment App

**Live Demo:** <https://women-safety-and-empowerment-1.onrender.com/> 🔗

**GitHub:** <https://github.com/ChinthaVarshini/women-safety-and-empowerment> 🔗

Developed a real-time Women Safety web application with emergency SOS alert functionality.

Implemented live GPS-based location sharing to notify registered emergency contacts instantly.

Designed one-click emergency alert system for quick response during critical situations.

Focused on user-friendly and responsive UI for accessibility and ease of use.

Deployed the application on cloud using **Render**, enabling public access and real-time availability.

Built as part of a hackathon project addressing real-world safety challenges.

### Intelligent Recipe Generator

Built an AI-based recipe generation system using ML, CV, and NLP.

Achieved ~85% accuracy in ingredient recognition using CNN and OCR.

Reduced manual recipe search time by ~60% through automated recommendations.

Processed multiple user inputs to generate personalized recipes in seconds.

**Library Management System**

Developed a Python-based Library Management System handling 500+ records.  
Reduced manual record management time by ~70%.  
Implemented fast search and update operations for books and users.  
Improved data accuracy and consistency through structured storage.  
<https://github.com/ChinthaVarshini/LibraryManagementSystem> 

**PROFESSIONAL EXPERIENCE**

---

**AI/ML Intern**

11/2025 – 01/2026

*Infosys Springboard*

Developed ML models improving ingredient recognition accuracy by ~15%.  
Preprocessed datasets to enhance model performance and reliability.  
Contributed to end-to-end development of a real-world AI application.  
Collaborated with team members to meet project deadlines successfully.

**STRENGTHS**

---

Strong analytical and problem-solving skills  
Quick learner and adaptable to new technologies  
Effective team player with good collaboration skills  
Attention to detail in coding and model development  
Passionate about AI/ML and building real-world solutions  
Good time management and ability to meet deadlines
